

Journeys

As readers:

We will be sharing a selection of books relating to journeys, travel and methods of transport

As writers:

We will be recording our experiences, making tickets and passports, sending postcards and reviewing a film.

As mathematicians:
We will be talking about direction and position, planning routes and making maps. We will be talking about our favourite vehicles and using the data to construct graphs and charts. We will be making paper aeroplanes and cars, and measuring the distance they travel.

As scientists:

We will be looking at building materials and selecting the most appropriate materials to build an ark.

As explorers:

We will be exploring our local area, going on a journey to the library, and making maps to show where we have been

As inventors:

We will be designing and building cars, planes and parachutes.

As musicians:

We will be singing Yellow Submarine, the animals came in 2 by 2 and other travel songs

As artists:

We will be exploring and representing our ideas through the medium of collage
