Year 3 - Autumn 1 - Home Learning Menu

Please encourage your child to choose one of the home learning tasks below. These are tasks which link with our classroom learning this half term and your child should choose to do one alongside their regular reading. Please ask if you need any support with these. This project is due in on Wednesday 2nd November.

Dive into a book	Stone Age Fun!	Make a times table poster
Read one of your favourite books at home and tell us about it in the most creative way you can. You can make models of characters from story or create a cartoon strip of the book. If your book is a non-fiction book, you can still tell us about it. Create a poster or fact file based on what you have read.	Our main topic this half term will be about the Stone Age. The Stone Age happened a very long time ago! Can you find out about Stone Age homes? What did they look like? What were they made of? Can you make a model Stone Age house using any materials that you choose? We would love to see pictures of your models.	In year 3 we will be learning more of our times tables. We would like you to create a poster with your tables on. You might choose to focus on one or two tables that you want to learn or make a poster with them all on. When you have finished it, please put it up somewhere to help you to learn them and send us a picture of it.
